RIMSHA IJAZ

Senior Software Engineer | Full Stack & AI-Assisted Development

Lahore, Pakistan | +923288324667 | rimijaz10@gmail.com | linkedin.com/in/rimsha-ijaz-2341382a3

PROFESSIONAL SUMMARY

Senior Software Engineer with 2.5+ years of experience shipping production full stack web applications with React.js, Next.js, TypeScript and Node.js. Delivered 9 live products across SaaS, ERP, productivity and AI domains, including a multi-company business platform with Stripe payments and third-party integrations. Known for reusable component architecture, clean REST API integration, technical SEO and performance-focused frontends, with production sites scoring 94–99 on Lighthouse performance and 100 on SEO. Uses AI-assisted development (Claude, Cursor, GitHub Copilot, OpenAI Codex) to ship faster, with strict review, testing and validation of every AI-generated change.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, Framer Motion

State & Data: Redux Toolkit, RTK Query, React Router, REST API integration

Backend & Database: Node.js, Express.js, MongoDB, Mongoose, JWT, OAuth, bcrypt; working knowledge of PHP and CodeIgniter

Integrations: Stripe, DHL, Trello, third-party and AI/LLM APIs

AI-Assisted Development: Claude, Cursor, GitHub Copilot, OpenAI Codex, ChatGPT; prompt writing, AI-assisted debugging and refactoring, code validation

SEO & Performance: Technical SEO, metadata, canonical URLs, Open Graph, structured data, XML sitemaps, robots.txt, performance optimization

Tools & Practices: Git, GitHub, Vite, Postman, Vercel; accessibility, cross-browser compatibility, code review

EDUCATION

Bachelor of Science in Computer Science (BSCS) | Virtual University of Pakistan | Graduated 2026

Associate Degree in Computer Science (ADP) | Virtual University of Pakistan | Graduated 2023

PROFESSIONAL EXPERIENCE

AppliconSoft

Senior Software Engineer | Jun 2026 – Present

- Own the frontend of production SaaS applications built with React.js, Next.js and TypeScript, from requirements through release.
- Design reusable component libraries and consistent UI patterns shared across product pages and features.
- Drive responsive design, performance and technical SEO implementation across product sites.
- Apply AI-assisted workflows (Claude, Cursor, Copilot) to coding, debugging and refactoring, with every change reviewed and tested before merge.
- Partner with the team on requirements and code reviews, resolving UI and integration issues to ship production-ready updates.

Software Engineer | Apr 2025 – May 2026

- Built and maintained responsive Next.js and React applications in TypeScript and JavaScript across multiple products.
- Integrated REST APIs and delivered interactive features across frontend applications.
- Improved component reusability, navigation and cross-device compatibility.
- Implemented technical SEO: metadata, canonical URLs, structured data and sitemap configuration.

Associate Software Engineer | Jun 2024 – Mar 2025

- Developed frontend components for business websites and web applications with React.js, HTML, CSS and JavaScript.
- Supported API integration, debugging and maintenance of existing application features.

React JS Intern | Mar 2024 – May 2024

- Built responsive interfaces with React.js and practiced component-based development with Git workflows.

SELECTED PROJECTS

ROI – Multi-Company SaaS Business Management Platform | roilevelup.com

- Built a multi-company SaaS platform covering CRM, customers, suppliers, appointments, invoicing, subscriptions, roles and permissions.
- Implemented Stripe payments and integrated external services including DHL and Trello.
- Built communication channels with multimedia and video support on scalable, API-driven workflows.

Stack: React.js, JavaScript, Redux, REST APIs, Stripe

ProAdvisorDrivers – AI-Assisted Interactive Web Application

- Maintained and enhanced a production application, resolving issues and delivering product requirements.
- Built AI-assisted form workflows and turned a traditional user flow into an interactive, game-like experience.

Stack: React.js, TypeScript, AI/API integration

Social Rocket AI – AI-Powered Social Media Platform | socialrocketai.com

- Built responsive interfaces for social content, scheduling, analytics and business workflows.
- Implemented technical SEO: metadata, Open Graph, canonical URLs, structured data, sitemap and robots.txt.
- Achieved Lighthouse scores of 98 (mobile) and 99 (desktop) for performance, with 100 in accessibility, best practices and SEO.

Stack: Next.js, React.js, JavaScript, Tailwind CSS

TrackPilot AI – Workforce Productivity SaaS | trackpilotai.com

- Built responsive interfaces for time tracking, productivity monitoring, project management and team performance.
- Improved reusable page architecture and animations, with SEO-friendly page structure and performance work.
- Achieved Lighthouse scores of 94 (mobile) and 96 (desktop) for performance, with 100 in SEO and best practices and 96 in accessibility.

Stack: Next.js, React.js, TypeScript, Tailwind CSS

The Pathfinder Hub – Career Development Platform | app.thepathfinderhub.com

- Built user profiles, resume management, forms and career workflows with Stripe payments and REST API integration.

Stack: React.js, JavaScript, Stripe, REST APIs

AsklyForm – MERN Stack Form Builder (Final Year Project) | asklyform.vercel.app

- Built a full stack form builder with form creation, drag-and-drop editing and live preview.
- Developed the Node.js and Express.js backend with MongoDB storage and JWT and bcrypt authentication.

Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, Material UI, JWT

Team Suite AI – Team Management Platform | teamsuiteai.com

- Built responsive, interactive interfaces for team management and productivity workflows, with reusable frontend architecture and technical SEO.

Stack: Next.js, React.js, TypeScript, Tailwind CSS

FlowLedgerPro – Accounting & ERP Platform | flowledgerpro.com

- Built responsive product interfaces for accounting and business workflows, focused on reusable UI, technical SEO and performance.

Stack: Next.js, React.js, TypeScript, Tailwind CSS

ZaadDocs – Document Management Platform

- Built a responsive product experience for business document management with reusable UI components and SEO and performance improvements.

Stack: Next.js, React.js, JavaScript, Tailwind CSS
